

Hello (Donor's Name),

Did you know 1 in 9 people worldwide do not have access to safe water?

Think about how many times you rely on water throughout your day. Imagine not being able to take a shower, brush your teeth or drink a glass of water. In the developing world, having access to water is a daily challenge and it's why I am taking action.

I'm partnering with the Lifepplus Foundation to help fund water projects in southeast Kenya. When you donate directly to my fundraising page (include URL), you will be helping to solve the water crisis by supporting projects that bring safe, local water to people in need.

When water comes to a community, there is better health, reliable food, education and hope. Please consider giving today. 100% of your donation will go directly to the field.

Thank you for supporting the important work of the Lifepplus Foundation and donating to my page!

Kind regards,

Your Name
